Welcome

Improving cycling facilities

Hello and welcome to Cyclepods Shelters (2012 VI Edition) We hope you will find it informative, easy to read and help answer any questions you may have.

Cyclepods Ltd launched in 2006 to transform and revolutionise cycle storage! Year on year, since inception, Cyclepods Ltd have designed, manufactured and supplied new innovative cycle storage solutions.

Our Values

Cyclepods is a Carbon Neutral company! This is central to our ethos and drives many of our values. After all, the end goal is to help make it easier and safer for people; young and old, to get out of cars and onto bikes and scooters.

We use re-cycled and re-cyclable materials in all of our products. We also aim to design solutions which make the installation of our products easier and less disruptive, so most of the time we don't need ground works. We are also conscious that one of the two biggest deterrents to cycling is bike theft. Therefore, we build as much security into our products as we can.

We are very proud that our Streetpod has just been approved by the UK Police sponsored "Secured by Design" and is the only cycle parking product afforded this status.

Finally, cyclists care about their bikes and often pay a lot of money for them, so we always aim that our products hold the bikes discreetly and carefully, which in turn deters over-crowding and damage to bikes.

Bespoke Service

Improving cycling facilities

The first and only Carbon Neutral Cycle Storage company

With our in-house design team, Cyclepods Ltd can offer you bespoke bicycle shelters to cater for your every requirement!

This service can be offered free to most projects and customers, taking an average of just one week for a finished design.

Due to a large back catalogue of designs we are able to offer guide prices for many and various styled shelters within a few days, therefore if you have a particular shelter style not shown in this brochure please contact us for a quick quote.
