

WESTERHAM BIKE TRACK

Material: Mild steel

Finish: Zinc oxide primed and polyester powder coated

Colour: Black (Other colours available on request)

Installation:

From wall: 300mm from side wall

Normal height: 585mm centres

Staggered height by between: 280mm and 330mm

Rack centres Recommended: 460mm centres

Rack centres Minimum: 380mm centres

A minimum distance from the wall of 1000mm is required to accommodate the cycle and a further minimum corridor width of 900mm is required for access.

Height requirements: Normal height 1855mm + 50mm to place bike when staggered

The Westerham is designed to be used with the cyclist's own D-lock or Cable lock. It secures the frame and both wheels to the rack, depending on lock used.

Fastenings: M6 60mm long shield anchor bolts or self tapping bolts, for concrete or brick walls, which can be supplied at extra cost. The rack should be fixed via the three holes in the back face of the track.

Additional Information:

Dimensions: 1500 x 112 x 112 mm

Wall thickness on wall channel: 2.5mm

Wall thickness on wheel clip: 4mm

Weight: 4kg
