

LOCK RACK

We all know that a secure bike lock is the key element in keeping our bikes safe, but a good D-lock & cable combo* is a heavy and cumbersome burden. The Lock Rack is designed for cyclists to leave their locks at their end destination, eliminating the need to carry them to & fro every day! Making cycling an easier and more convenient option.

The rack is designed to be high enough to prevent cyclists from using it as a rack and is a perfect accessory to our Pump XL and Repair XL.

The laser cut centre plate is customisable with company logos, maps, images or text.

Designed and made in the UK.

Product dimensions:
H 1500mm x W 550mm

Specification:
Main Body: 50 x 3mm tube
Foot: 8mm steel
Centre Plate: 6mm steel
